ActivInspire Core Essentials Classes

Enclosed is the latest scheduled course offering from Basic Computer Learning.

Classes are for Mac and Windows users.

ActivInspire is the latest software available for the Promethean ActivBoard. It is not a revision of ActivStudio but a new program with many changes and enhancements. Some of these features include

- Only one version of ActivInspire is needed. It is cross platform: Mac and Windows.
- Users may choose a primary or secondary look based on grade level and comfort.
- Many new templates are included for quick lesson building.
- There is an easier user-interface for quick design and customization.
- Open all previously created flipcharts in Inspire.
- ActivExpressions work with ActivInspire and do not require separate software.

The full professional version is a free download from prometheanplanet.com until September 2010 for existing ActivBoard users.

Requirements for ActivInspire: **Mac:** Intel Mac, OS 10.4.11 & above, 512MB RAM, 1024x768 resolution, 10 GB free disk space
PC: WIN XP, Vista or Windows 7, Pentium 4, 1 GHz processor, 512MB RAM, 1024x768 resolution, 10 GB free disk space

Courses: **Core Essentials I**

- New ActivBoard users
- Users migrating from ActivStudio

The new Promethean ActivInspire training manual is included with each course.

Prior to the Core Essentials I training participants should complete either Introduction to ActivInspire or Migration to ActivInspire. Both tutorials are free and are found at <http://www.prometheanplanet.com/server.php?show=nav.17567>
